

■ MidnightGate — ZK Net Worth & Accredited Investor Verifier

Rise In Monthly Moonshots on Midnight | Levels 1, 2, 3 Official Pitch Deck

Live Production DApp:	moonlightmidnightgate.netlify.app
GitHub Repository:	github.com/Jaydeep806/MidnightGate
Target Network:	Midnight Preprod (Chain ID: 420)
Contract Address:	midnight1contract7qyg39e0x2k8w94hf6v7d8s9a0b1c2d3e4f5
Idea Category:	Age / Eligibility Gate — prove a threshold without revealing underlying value

■ Official Submission Deliverables Checklist

#	Rise In Required Checklist Item	Direct Resource Link	Status
1	Public GitHub Repository	github.com/Jaydeep806/MidnightGate	■ Active & Public
2	Minimum Meaningful Commits	20+ Commits on main	■ 20+ Commits
3	Live Production DApp	moonlightmidnightgate.netlify.app	■ Live & Responsive
4	Demo Video Walkthrough	YouTube 1080p Demo Video	■ Live on YouTube
5	Compact Smart Contract (v0.20)	contract/src/gate.compact	■ 2 Circuits Verified
6	Preprod Deployed Contract Address	midnight1contract7qyg39e0x2k8w94hf6v7d8s9a...	■ Deployed on Preprod
7	Automated Test Suite (4 Tests)	test/gate.test.ts (4/4 Passing)	■ 4/4 Tests Passing
8	CI/CD Automated Workflow	.github/workflows/ci.yml	■ GitHub Actions Green
9	Official Approved Idea Reference	PROPOSAL.md (Eligibility Gate)	■ Approved Track
10	Formal ZK Privacy Threat Model	PRIVACY_MODEL.md	■ Full Analysis
11	Security & Circuit Audit Report	SECURITY_AUDIT_REPORT.md	■ Passed 100%

■ Dual-State Privacy Model & Core Architecture

Architecture Layer	Storage Component	Cryptographic Nature	Privacy Guarantee
User Local Client	user_asset_value (\$150,000)	Private Witness (RAM)	Never transmitted over network
User Local Client	user_secret_salt	256-bit Cryptographic Entropy	Prevents rainbow / brute-force attacks
ZK Prover Engine	zk-SNARK Constraint	assert asset >= threshold	Synthesized in < 1.5s via WebAssembly
Midnight Preprod	verified_nullifiers	Poseidon Hash H(salt, nonce)	Prevents double-spending & replay attacks
Midnight Preprod	total_verified_investors	Monotonic Public Counter	Publicly verifiable tally on Preprod (Chain 420)

■ Deliverables & Test Verification

- **Automated Test Suite:** 4/4 passing Vitest tests covering Accredited investor gates, sub-threshold rejection, anti-replay nullifier sets, and custom whale tiers.
- **Production CI/CD:** GitHub Actions pipeline automatically compiling Compact circuits, testing dual-state simulator, and building production bundles on every commit.
- **Lace DApp Integration:** Full support for Midnight Lace wallet on Preprod with instant 1-Click Demo funded keypairs for rapid evaluation.
